25X1 1. [ ] attended the fifth annual classified Military Space Symposium. The symposium, sponsored by the American Astronautical Society, was held in the Dean Acheson Auditorium of the Department of State on 30-31 July. Military and civilian dignitaries and space experts comprised the list of guest speakers. The subjects covered during the symposium ranged from communications capabilities to future military applications of space sensors.

2. MPS representatives attended a demonstration of the Image Data Corporation's Photophone in the ED Conference Room on 30 July. The equipment appeared to be well-packaged, with many state-of-the-art features applicable to OC's needs.

3. Discussions were held with a representative from OIT on 28 July to review the methodology utilized by OC for tracking requirements levied on OC by its customers. OIT plans to review available material and documentation in the event they decide to develop a comparable system of their own.

25X1

With assistance from [redacted] CSD has completed testing of the Grid-Second Phase Automated Relay Switch (SPARS) interface. This will allow the Grid compass computer to be used in SPARS security certification. Use of the Grid for security testing should minimize the impact on operations and eliminate the need for hardware reconfiguration of the SPARS during the tests.
